AUTHOR INDEX

Volume 64 (1987)

Bernardi, C., On a theorem about vertex colorings of graphs (Note) (1) 95–96
Champetier, C., On the null-homotopy of graphs (Note) (1) 97–98
Chernyak, A.A., Zh.A. Chernyak and R.I. Tyshkevich, On forcibly hereditary P-graphical sequences (2,3) 111–128
Chernyak, Zh.A., see A.A. Chernyak (2,3) 111–128
Dauenhauer, M.H. and H.J. Zassenhaus, Local optimality of the critical lattice sphere-packing of regular tetrahedra (2,3) 129–146
Downs, M.L.N. and G.A. Jones, Enumerating regular objects with a given automorphism group (Communication) (2,3) 299–302
Erdös, P., N. Linial and S. Moran, Extremal problems on permutations under cyclic equivalence (1) 1–11
Evans, A.B., Orthomorphisms of Z_p (2,3) 147–156
Gropp, H., The elementary abelian Steiner systems $S(2, 4, 49)$ (Communication) (1) 87–90
Guo, K.-F., see F.-J. Zhang (2,3) 289–298
Hershkowitz, D., Linear mappings which preserve acyclicity properties of graphs and digraphs and applications to matrices (2,3) 157–190
Hilton, A.J.W., Recent progress on edge-coloring graphs (Communication) (2,3) 303–307
Horák, P., see J. Širáň (2,3) 263–268
Huang, T., An analogue of the Erdös–Ko–Rado theorem for the distance-regular graphs of bilinear forms (2,3) 191–198
Jones, G.A., see M.L.N. Downs (2,3) 299–302
Kelmans, A.K., A short proof and a strengthening of the Whitney 2-isomorphism theorem on graphs (1) 13–25
Korec, I., Improvement of Mycielski's inequality for non-natural disjoint covering system of Z (1) 27–38
Limaye, N.B., S.S. Sane and M.S. Shrikhande, The structure of triangle-free quasi-symmetric designs (2,3) 199–207
Linial, N., see P. Erdös (1) 1–11
Luccio, F., S. Mazzone and C.K. Wong, A note on visibility graphs (2,3) 209–219
Maehara, H., On the number of induced subgraphs of a random graph (Note) (2,3) 309–312
Maffray, F. and H. Meyniel, On the relationship between Hadwiger and stability numbers (1) 39–42
Mazzone, S., see F. Luccio (2,3) 209–219
Meyniel, H., see F. Maffray (1) 39–42
Mohanty, S.G., see T. Watanabe (2,3) 281–288
Moran, S., see P. Erdös (1) 1–11
Nathanson, M.B., An extremal problem for least common multiples (2,3) 221–228
Paulraja, P., Counterexample to a conjecture on Hamilton cycles (Note) (1) 99
Polat, N., A compactness result for perfect matchings (2,3) 229–237
Rotman, J.J., Finite planes and graphs (1) 43–79
Sabidussi, G., Color-reversal by local complementation (1) 81–86
Sane, S.S., see N.B. Limaye (2,3) 199–207
Schäffer, A.A., Shortest prefix strings containing all subset permutations (2,3) 239–252
Schein, B.M., Semigroups of tolerance relations (2,3) 253–262
Sebö, A., A quick proof of Seymour's theorem on t-joins (Note) (1) 101–103

Shrikhande, M.S., see N.B. Limaye (2,3) 199–207
Širáň, J. and P. Horák, A construction of thickness-minimal graphs (2,3) 263–268
Stiebitz, M., K_5 is the only double-critical 5-chromatic graph (Communication) (1) 91–93
Straubing, H., Applications of the theory of automata in enumeration (2,3) 269–279
Trotter, W.T. and D.B. West, Poset boxicity of graphs (Note) (1) 105–107
Tyshkevich, R.I., see A.A. Chernyak (2,3) 111–128
Watanabe, T. and S.G. Mohanty, On an inclusion-exclusion formula based on the reflection principle (2,3) 281–288
West, D.B., see W.T. Trotter (1) 105–107
Wong, C.K., see F. Luccio (2,3) 209–219
Zassenhaus, H.J., see M.H. Dauenhauer (2,3) 129–146
Zeilberger, D., Enumerating totally clean words (Note) (2,3) 313–315
Zhang, F.-J. and K.-F. Guo, Hamilton cycles in directed Euler tour graphs (2,3) 289–298
